Step Ahead Innovations Hires PhD Chemist George Jarvis to Lead Research & Development

So. Burlington, VT — Step Ahead Innovations, Inc., creators of the groundbreaking MindStream Monitor for high-end reef aquariums, today announced the hiring of a new Vice President of Research & Development, Dr. George Jarvis.

Dr. Jarvis previously headed an R&D group at Thermo Fisher Scientific, a world leader in analytical instrument products with \$24 billion in annual revenue. He is an accomplished chemist with extensive experience in water quality monitoring and sensors, more than 20 patents, and strong chemistry knowledge in all types of water, especially saltwater. He earned his BS in Chemistry from the University of Lowell and both his MS in Electro-Optics/Chemistry and his PhD in Physical Chemistry from Tufts University.

During his tenure at Thermo Fisher, Jarvis led the release of 12 new product lines. He is a talented innovator with a fondness for solving big problems and getting products to market.
